

Discursive intelligence for organisations — surface meaning risks that traditional tools miss

**7**  
DIMENSIONS OF ANALYSIS

**1,500+**  
STORIES ANALYSED DAILY

**£300/mo**  
STARTING FROM

## WHAT WE DO

CognioEngine analyses documents, reports, and public communications to surface **meaning risks** that traditional tools miss — cultural blind spots, framing bias, missing perspectives, and narrative drift.

We add a **discursive intelligence layer** on top of your existing data platform.

## THE 7 DIMENSIONS

Indigenous Knowledge   Deep History   Cross-Cultural  
 Scientific Rigour   Artistic Perception   Future Modelling  
 Marginalised Voices

## SERVICES

- **Corrective Audit** — deep analysis of board packs, annual reports, strategy papers scored across all 7 dimensions. Annotated report with actionable recommendations.
- **Board Pack Review** — purpose-built governance analysis. Surfaces what your board pack says, doesn't say, and should.
- **Risk Register** — epistemic risk mapping with mitigation plan and ongoing monitoring triggers.
- **Continuous Monitoring** — ongoing analysis of published content with drift alerts.
- **Training** — CognioSynthetic Analyst certification via Aligned & Certified.

## WHY US

CognioNews processes **thousands of stories daily** through this engine. It's not a prototype — it's running in production, correcting real content, every day. We built the category of epistemic governance.

## PRICING

Package	Price	Includes
